Assignment No. 1: Website Analysis Report

Case study: Before coding of the website, planning is important, students should visit different websites (Min. 5) for the different client projects and note down the evaluation results for these websites, either good website or bad website in following format.

Website: Amazon

URL: https://www.amazon.in
Category: E-Commerce Website

1. Purpose of the Website

Amazon is an international e-commerce website that functions as an online marketplace for both buyers and sellers.

Main Objectives:

• easy online purchasing

• platform for third-party sellers

• secure online payment and tracking services

• provide product comparisons, reviews, and ratings

• doorstep delivery and customer services

Analysis: The website successfully provides services for online purchasing, selling, and logistics management .The website is more focused on user convenience, automation, and scalability rather than static information. Amazon functions as a service-oriented and transaction-based system.

2. **Things Liked in the Website**

Positive Aspects:

- Fast Loading Speed - The website uses optimized images, caching, and content delivery networks (CDN) for fast loading.
- User-Friendly Navigation -Search functionality, filters, categories, and breadcrumbs help users find products.
- Proper Validation - Login, registration, address, and payment pages use strong input validation.
- Image Optimization - High-resolution images of products with zoom and lazy loading capabilities improve user experience.
- API Integration - Payment functionality, order status, suggestions, and notification systems are API-integrated.
- Information Accessibility -Product details, prices, reviews, delivery details, and return policies are accessible.
-

3. **Things Disliked in the Website**

- Complex Interface - First-time users may find it confusing due to the amount of content.
- Heavy Content Pages - Too many images and scripts consume a lot of data.
- Too Many Recommendations - Too many suggestions may divert the attention of the user from the task at hand.
- Accessibility Issues - Some parts of the website are not accessible to the visually impaired.

4. Technologies Used

Front-End Technologies:

- HTML
- CSS
- JavaScript
- React

Back-End Technologies:

- Java / Node.js – Server-side logic and request handling

Database:

- MySQL / DynamoDB

APIs

- Payment Gateway API
- Delivery Tracking API
- Recommendation System API

5. Font & Design (UI/UX Theory)

Font Usage:

- Clean and readable fonts
- Consistent font style across pages

Design Layout:

- Modern and responsive design
- Proper alignment of text and images
- Mobile-friendly layout

UI/UX Evaluation:

- Excellent usability
- Smooth navigation
- Designed to increase user engagement and conversion

6. Overall Evaluation

Amazon is a technically advanced, secure, and high-performance website.
It effectively applies modern web technologies for e-commerce operations.

Overall Rating: Excellent Website

2. AICTE

Website: AICTE
URL: https://www.aicte-india.org
Category: Government / Regulatory Website

1. Purpose of the Website

AICTE is the official governing body for technical education in India.

Main Objectives:

- Regulating technical institutions
- Publishing policies, approvals, and notifications
- Providing official academic information

Analysis: The website is more about providing accurate and authentic information rather than user interaction.

2. Things Liked in the Website

• Authentic and official information
• Clear content structure
• Secure HTTPS connection
• Simple text-based access
• Basic form validation

3. **Things Disliked in the Website**

• Slow loading speed
• Outdated UI design
• Poor mobile responsiveness
• Complex navigation
• Very limited image usage

4. Technologies Used

Front End: HTML, CSS, JavaScript
Back End: PHP
Database: MySQL

Analysis:
Simple and cost-effective stack suitable for government portals.

5. Font & Design

• Formal fonts
• Government-style layout
• Minimal graphics

6. Overall Evaluation

The AICTE website is reliable and informative but visually outdated.

Overall Rating: Good Website

3. ROBU.IN

Website: Robu.in
URL: https://robu.in
Category: Technical E-Commerce Website

1. Purpose of the Website

Robu.in provides electronic and robotics components for students and engineers.

Main Objectives:

- To sell electronic components
- To provide technical specifications
- To support academic and DIY projects

Analysis:
The website combines information delivery with e-commerce services.

2. Things Liked in the Website

• Clear product descriptions
• Good quality product images
• Categorized navigation

• Secure payment gateway integration
• Basic form validation

3. Things Disliked in the Website

• Crowded interface
• Average loading speed
• Inconsistent font sizes
• Slow customer support response

4. Technologies Used

Front End: HTML, CSS, JavaScript
Back End: PHP
Database: MySQL
APIs: Payment, Shipping

5. Font & Design

• Technical-oriented fonts
• Functional layout
• Proper image placement

6. Overall Evaluation

Robu.in is a functional and informative technical e-commerce website.

Overall Rating: Very Good Website

4. SANJIVANI COLLEGE OF ENGINEERING

Website: Sanjivani COE
URL: https://sanjivanicoe.org.in
Category: Academic Website

1. Purpose of the Website

This is the official college website used for academic communication.

- Main Objectives:
  • To provide academic and departmental information

- To display admissions and placements
- To share notices and announcements

Analysis:
The website focuses mainly on static academic content.

2. Things Liked in the Website

- Detailed academic information
- Structured content layout
- Contact information available
- Basic image usage
- HTTPS validation

3. Things Disliked in the Website

- Slow loading speed
- Outdated design
- Text-heavy pages
- Alignment issues
- Navigation complexity

4. Technologies Used

Front End: HTML, CSS, JavaScript
Back End: PHP
Database: MySQL

5. Font & Design

- Simple and readable fonts
- Academic-style layout
- Minimal graphics

6. Overall Evaluation

The website is informative but needs modernization.

Overall Rating: Good Website

5. GEEKS FOR GEEKS

Website: GeeksforGeeks
URL: https://www.geeksforgeeks.org
Category: Educational Website

1. Purpose of the Website

GeeksforGeeks is an online learning platform for computer science education.

Main Objectives:
• To provide programming tutorials
• To support interview preparation
• To offer coding practice resources

Analysis:
The website focuses on content-based learning and interactivity.

2. Things Liked in the Website

• Well-organized educational content
• Fast loading speed
• Good navigation and search
• Proper code formatting
• API-based login and analytics
• Responsive design

3. Things Disliked in the Website

• Too many advertisements
• Pop-ups interrupt reading
• Long content pages

4. Technologies Used

Front End: HTML, CSS, JavaScript, React
Back End: Node.js
Database: MongoDB
APIs: Authentication, Analytics

5. Font & Design

• Developer-friendly fonts
• Clean layout
• Proper alignment and spacing

6. Overall Evaluation

GeeksforGeeks is a high-quality educational website for IT students.

Overall Rating: Very Good Website

Final Evaluation Table –

Website	URL	Purpose	Things Liked	Things Disliked	Overall Evaluation
Amazon	https://www.amazon.in	Online shopping platform for buying and selling products	Easy navigation, many products, secure payment, clear images, mobile friendly	Too many suggestions, crowded UI, sometimes slow load	**Very Good**
AICTE	https://www.aicte-india.org	Provides guidelines, approvals, and policies for technical education	Official information, trusted source, useful for students & colleges	Outdated design, slow loading, hard navigation	**Good**
Robu.in	https://robu.in	Online store for electronics and robotics components	Clear product details, niche products, useful for engineering students	Limited product range, delivery delays , slower load sometimes	**Good**
SCOE	https://sanjivanicoe.org.in	College website providing academic & admission information	Detailed college info, placement data, easy menu	Old design, slow loading, text heavy	**Good**
GeeksforGeeks	https://www.g	Learning and coding	Lots of tutorials, interview prep, coding problems	Mixed quality of content, ads, some irrelevant posts	**Good**

Conclusion –

This website analysis provided a clear understanding of how web technologies are applied in real-world websites. The studied websites successfully fulfill their respective purposes such as e-commerce, education, government regulation, and academic information delivery. All websites are functionally correct and secure, but they differ in design quality, performance, and user experience. E-commerce websites focus more on speed, interaction, and APIs, while academic and government websites focus mainly on information accuracy.

Overall, improvements in UI/UX design, performance optimization, navigation, and responsiveness can enhance the effectiveness of these websites according to modern web standards.
